### BEZEQ GROUP REPORTS SECOND QUARTER 2008 FINANCIAL RESULTS

Net profit attributable to shareholders rises 21.1% year-over-year to NIS 437 million on revenues of NIS 3.09 billion

EBITDA increases 21.4% year-over-year to a record NIS 1.22 billion

Board of Directors recommends distribution of a cash dividend to shareholders of NIS 835 million

**Tel Aviv, Israel – August 21, 2008** – Bezeq The Israel Telecommunication Corp., Limited (TASE: BEZQ), Israel's leading telecommunications provider, announced today its financial results for the second quarter 2008, the period ended June 30, 2008. Details regarding today's investor conference call and web cast are included later in this press release.

#### **Bezeq Group Second Quarter 2008 Financial Highlights:**

- Revenues of NIS 3.09 billion, up 1.1% compared to the prior year period.
- Operating profit totaled NIS 800 million, up 40.1% compared to the prior year period.
- Net profit attributable to shareholders totaled NIS 437 million, up 21.1% compared to the prior year period.
- Earnings per basic and diluted shares amounted to NIS 0.17, compared to earnings per basic and diluted share of NIS 0.14 for the second quarter of 2007.
- Earnings before interest, taxes, depreciation and amortization (EBITDA) totaled NIS 1.22 billion, up 21.4% compared to the prior year period.
- EBITDA margin was an impressive 39.6% compared to 33.0% in prior year period.
- Capital expenditures (gross) totaled NIS 386 million, up 38.8% year-over-year.
- Free cash flow totaled NIS 416 million, a decline of 19.4% year-over-year and an increase of 25.3% sequentially.

#### **Divisional Highlights:**

- Bezeq Fixed-Line: Fixed-Line segment results were highlighted by a 76.1% year-over-year increase in operating profit to NIS 428 million, and a 33.4% increase in EBITDA to NIS 639 million. Segment EBTIDA margin totaled an impressive 47.2% for the quarter. While Fixed-Line revenues posted a modest and anticipated decline, the improvement in profitability was driven by streamlining efforts that have begun to yield significant benefits to the segment's and the Group's bottom lines.
- Pelephone: Pelephone's mobile operations delivered double-digit year-over-year and sequential growth in operating profit and EBITDA, as revenues rose 3.1%. EBITDA reached NIS 396 million, yielding an EBITDA margin of 33.3%, the highest for Pelephone in several years. Results were driven by the strength of Pelephone's 3G subscriber growth (977,000 total 3G subscribers as of June 30 and over one million as of today), which helped push total cellular subscribers up to approximately 2.64 million, an increase of 4.9% year-over-year.

# 8

### **Press Release**

- Bezeq International: Operating profit increased 18.9% year-over-year to NIS 63 million and net profit increased 20.5% to NIS 47 million driven by continued focus and enhanced profitability in core businesses such as broadband Internet services, international calls, as well as a doubling in revenues associated with the segment's enterprise integration solutions. EBITDA reached a record NIS 83 million, up 10.7% year-over-year, and reflecting an EBITDA margin of 25.5%.
- yes: Multi-channel pay-TV revenue increased 7.3% year-over-year to NIS 380 million driven by a 5.5% improvement in ARPU to NIS 230 and a 1.5% increase in subscribers to 551,000. EBITDA reached NIS 103 million, up 3.0% year-over-year, reflecting an EBITDA margin of 27.1%.

**Dividend Highlight:** The company's Board of Directors has recommended the distribution of a cash dividend to shareholders of NIS 835 million, or approximately NIS 0.32 per share.

Shlomo Rodav, Chairman of the Board of Bezeq, stated, "The strength of our second quarter financial performance completes an excellent first half of 2008. With strong double-digit year-over-year improvements in Group wide operating profit, net profit attributable to shareholders and EBITDA we are seeing clear evidence that the corporate streamlining and operating efficiency measures we continue to implement are yielding results, as we also continued to see top line growth versus the comparable year ago period. All segments of the business delivered year-over-year growth, with the exception of revenues related to traditional fixed-line telephony which was anticipated to decline modestly and was partially offset by record revenues related to high-speed Internet and data communications services.

"Following the recent decisions concerning the Gronau Committee recommendations by the Minister of Communications on August 13<sup>th</sup>, we are pleased to have some initial clarity on the regulatory front, although we cannot assess at this stage what will be the exact impact on the Group's business results. Accordingly, we will be moving to adapt Bezeq's strategy and offerings to maximize any new opportunities that are created as well as meet the challenges that arise as we move forward.

"While the details of these decisions, and many other aspects of the new regulatory guidelines, remain to be clarified, we believe that over the long-term the net impact from the expected regulatory changes will benefit service providers that are able to offer a comprehensive range of communications services, which is where Bezeq excels as the market leader. Overall, our aim remains to maintain our position as the leading communications service provider in Israel while continuing to deliver long-term value to our customers, employees and shareholders," concluded Mr. Roday.

Alan Gelman, Chief Financial Officer and Deputy CEO of Bezeq, commented, "Based on the strength of our second quarter and first half 2008 financial performance, and healthy cash flows from operations, we are pleased to announce that our Board of Directors has recommended the distribution of a cash dividend to shareholders totaling NIS 835 million; this is in addition to the NIS 679 million dividend declared last March and paid during the second quarter. Dividend remuneration to our shareholders remains a key component of our corporate strategy as we also use the strength of our cash flows to reduce debt and reinvest in our core businesses as evidenced through our higher capital investments in our new Pelephone HSPA infrastructure and our fixed-line Next Generation Network project, while maintaining full financial flexibility for the Group. These network investments are expected to open up higher value segments of the communications services market while, in the NGN case, it also offers infrastructure that is expected to deliver new long-term operating efficiencies as well as lower maintenance costs.

"While improvements during the second quarter were evident across our key profitability measures, we did experience an increase in finance expenses during the second quarter, primarily due to the fact that most of the Group's debt is linked to the Israeli consumer price

index which increased 2.24% during the quarter, resulting in higher financing expenses as compared to the year-ago period. We are pleased with the Group wide performance in the first half of the year and look forward to building on these gains in the second half of 2008," concluded Mr. Gelman.

#### **Bezeq Group Consolidated Results**

Bezeq Group (Consolidated)	Q2 2008	Q2 2007	<u>Change</u>	H1 2008	H1 2007	<u>Change</u>

Net debt/shareholders' equity (end of p	eriod)			1.11	1.00		

<sup>\*</sup> EBITDA in this calculation refers to trailing twelve months

Bezeq Group's revenues for the second quarter of 2008 were NIS 3.09 billion, up 1.1% from NIS 3.05 billion reported for the second quarter of 2007. Higher revenues were driven by higher sales in our Pelephone, Bezeq International and yes business segments. Strong sales of high speed Internet and data communications services at our Fixed-Line segment mitigated the anticipated decline in revenue associated with fixed-line telephony.

Operating profit for the Group increased 40.1% year-over-year to NIS 800 million, up from NIS 571 in the year ago period, driven mainly by cost reduction and streamlining initiatives in our major operating segments, as well as slightly higher Group revenues.

The Group's earnings before interest, taxes, depreciation and amortization (EBITDA) for the second quarter of 2008 were approximately NIS 1.22 billion (39.6% EBITDA margin), up 21.4% as compared to the second quarter of 2007 (33.0% EBITDA margin).

Net profit attributed to Bezeq shareholders amounted to NIS 437 million in the second quarter of 2008, up 21.1% compared with the NIS 361 million reported in the second quarter of 2007.

Net capital expenditures amounted to NIS 360 million in the second quarter of 2008, an increase of 98.9% compared to the second quarter of 2007, mainly due to the ongoing deployment of Pelephone's HSPA network, and to some extent also due to lower proceeds from the sale of property, plant and equipment as compared to the same period of 2007.

The Bezeq Group's free cash flow totaled NIS 416 million in the second quarter of 2008, a decrease of 19.4% compared to the second quarter of 2007. The decline in free cash flow was primarily the result of significantly higher net capital expenditures, which were partially offset by an 11.3% increase in cash flows from operations.

As of June 30, 2008, the Group's net financial debt was NIS 5.25 billion, compared with NIS 4.71 billion as of June 30, 2007.

#### **Bezeq Fixed-Line Results**

<sup>\*</sup> Not including revenues from data communications and transmission services, services to communications providers, and contract and other work. This item has been updated going back to 1.1.2006 in order to present nominal figures instead of normalized

Bezeq fixed-line's primary objectives remain to compensate for the predictable erosion in domestic telephony revenues with growing revenues from broadband Internet and value-added services, and solutions for the business segment, as well as reducing costs. While revenues posted a modest decline, the segment posted significant improvements in terms of year-over-vear operating profit and EBITDA performance.

Revenue from fixed-line domestic communications declined 2.8% to NIS 1.35 billion in the second quarter of 2008 compared to NIS 1.39 billion in the second quarter of 2007. The decrease in fixed-line revenue was mainly due to a decrease in interconnect fees to the cellular networks as well as a decrease in the number of lines, mainly due to number portability, a reduction in call traffic and a decrease in tariffs. The decrease in revenue was moderated mainly by stronger levels of revenues generated from high-speed Internet service (ADSL) and by an increase in data communication services.

When adjusted for revenues from cellular airtime collected by Bezeq and paid to the cellular companies, Bezeq Fixed-Line's revenues reached NIS 1.14 billion, a decline of just 1.0% year-over-year. This continues to demonstrate Bezeq's ability to compensate for the decline in legacy telephony revenues through growing advanced services and solutions offered to the consumer and business markets.

Bezeq set another new record for the number of customers subscribing to its high-speed Internet service (ADSL), rising 6.3% year-over-year to 982,000 as of June 30, 2008. Even more importantly, Bezeq continued to upgrade its ADSL subscriber base, with 42% of it already enjoying bandwidths of at least 2 MB, as compared to 23% in the prior year period.

<sup>\*\*</sup> The increase in incoming minutes compared to the corresponding period in 2007 stems from an increase in traffic minutes from domestic carriers in competition with Bezeq.

### **Press Release**

The growth in Bezeq's ADSL customer base helped offset a 3.5% decline in total telephony access lines during the same period which totaled 2.68 million as of June 30, 2008. The pace of decline in telephony access lines has slowed down to 31,000 lines lost during the second quarter of 2008, from 48,000 lines lost during the first quarter of 2008, which reflects a more moderate impact from fixed-line number portability.

ADSL ARPU in the second quarter was NIS 57.7, down just 0.7% from the prior year period, while fixed-line telephony ARPL fell 2.9% year-over-year to NIS 82.6.

Bezeq's fixed-line segment posted positive EBITDA of NIS 639 million (47.2% EBITDA margin) in the second quarter of 2008, compared to NIS 479 million (34.4% EBITDA margin) in the second quarter of 2007. This significant improvement was driven by an 8% decline in wages, and almost a 16% reduction in general and operating expenses. These reflect the success of cost-cutting measures that have been taken in this segment over the past year and have now begun to yield results.

During the second quarter the company announced the formal launch and deployment of its Next Generation Network (NGN) project, including full coverage in two operational trials as well as the purchase of soft switches. The project will be deployed on a modular basis, and the Company will evaluate the completion of each stage, and update the development and deployment strategy, timeline on an annual basis.

#### **Pelephone Results**

Pelephone	Q2 2008	Q2 2007	<u>Change</u>	H1 2008	H1 2007	<u>Change</u>
	(NIS millions)		(NIS millions)

Average monthly minutes of use per subscriber (MOU)	358	350	2.3%	357	347	2.7%

Pelephone generated double-digit percentage improvements year-over-year in operating profit, and EBITDA performance driven by growth in its subscriber base, in revenues related to data, content and value added services, lower handset subsidies, as well as a continued focus on cost efficiencies.

As of June 30, 2008, Pelephone had approximately 2.64 million active subscribers, an increase of 4.9% year-over-year, and a net addition of 41,000 subscribers from the first quarter of 2008. Pelephone remains the market leader in 3G subscribers with a record 977,000 3G subscribers as of June 30, 2008, representing over 37% of all Pelephone subscribers (and over one million 3G subscribers as of today, or about 38% of its total subscriber base). Pelephone revenues from data and value added and content services constituted a record 15.5% of revenues from

### **Press Release**

cellular services in the second quarter, compared to approximately 12.5% in the year ago period.

Pelephone's revenues increased 3.1% year-over-year to NIS 1.19 billion in the second quarter of 2008. The rise is mainly attributable to an increase in the number of subscribers. which was partially offset by a decrease in average revenue per user, mainly due to erosion of fees for outgoing calls and a decrease in interconnect fees. There was also an increase in revenue from sale of terminal equipment, due to an increase in the number of handsets sold and upgraded.

Pelephone posted positive EBITDA of NIS 396 million (33.3% EBITDA margin) in the second quarter of 2008, compared to NIS 355 million (30.8% EBITDA margin) in the second quarter of 2007. Pelephone's net profit in the second quarter of 2008 increased 4.0% year-over-year to NIS 180 million.

The company is continuing with the deployment of the new HSPA wireless network infrastructure and expects this network to be operational by the beginning of 2009. The HSPA network initiative is central to Pelephone's commitment to leading edge technologies, leveraging new higher value segments of the mobile communications market and delivering our customers additional choice when selecting a mobile solution that best meets their needs.

#### **Bezeq International Results**

Bezeq International	Q2 2008	Q2 2007	<u>Change</u>	H1 2008	H1 2007	<u>Change</u>
	(NIS m	nillions)		(NIS m		
Revenues	326	321	1.6%	640	644	-0.6%
Operating profit	63	53	18.9%	117	104	12.5%
EBITDA	83	75	10.7%	157	149	5.4%
EBITDA margin	25.5%	23.4%		24.5%	23.1%	
Net profit	47	39	20.5%	88	76	15.8%
Cash flows from operating activities	51	32	59.4%	59	31	90.3%
Capex, net	31	18	72.2%	59	26	126.9%
Free cash flow	20	14	42.9%	-	5	n.m.

Bezeq International, Israel's leading supplier of Internet services, direct-dial international calls in Israel and network end-point (NEP) services, posted second quarter 2008 segment revenue of NIS 326 million, up 1.6% compared to the second quarter of 2007. The increase in year-over-year revenue was driven by higher revenue from Bezeq International's core business areas, primarily those related to Internet broadband service, outgoing calls and enterprise integration solutions. Gains in these areas were partially offset by a decline in hubbing traffic between foreign operators using Bezeq International's switching equipment.

Bezeq International posted a record EBITDA of NIS 83 million (25.5% EBITDA margin) in the second quarter of 2008, up 10.7% compared to NIS 75 million (23.4% EBITDA margin) in the second quarter of 2007.

Bezeq International generated an operating profit of NIS 63 million and a net profit of NIS 47 million in the second quarter of 2008, up 18.9% and 20.5% respectively year-over-year. The rise in net profit year-over-year came as a result of growth in all core business areas, combined with a decrease in general and operating expenses.

As reflected in its quarterly and half-year results, Bezeq International continues to lead the ISP and direct-dial international calls markets in terms of revenues, profits and profit margins.

#### yes Results

Average revenue per user (ARPU, NIS)	230	218	5.5%	231	218	5.7%	

<sup>\*</sup> Including subscriber acquisition costs

Revenue from the yes multi-channel pay-TV segment increased 7.3% to NIS 380 million in the second quarter of 2008 from NIS 354 million in the year ago period. The rise in revenue was primarily related to a 5.5% year-over-year increase in ARPU to NIS 230 as well as a 1.5% net increase in subscribers.

Net loss for the yes segment in the second quarter of 2008 totaled NIS 99 million compared to a net loss of NIS 65 million in the second quarter of 2007, an increase of 52.3% year-over-year. This increase stemmed mainly from higher finance expenses related to debt linked to the Israeli consumer price index (CPI), an increase in content costs due to broadcasts of original productions and an increase in maintenance services by subcontractors.

yes posted positive EBITDA of NIS 103 million (27.1% EBITDA margin) in the second quarter of 2008 as compared to EBITDA of NIS 100 million (28.2% EBITDA margin) in the second quarter of 2007.

The number of yes subscribers as of June, 2008 was 551,000, up 8,000 subscribers from the year ago period and up from 549,000 as compared to March 31, 2008.

#### **Outlook**

Based on current business conditions, Bezeq continues to expect Group wide full year 2008 revenues to remain stable, reflecting the combination of continued erosion in domestic fixed-line telephony with growth across the rest of the business segments. In addition, the company expects to continue focusing on reducing costs and expanding margins. Regarding Group level gross capital expenditures, in 2008 the company is reiterating its forecast for an increase of approximately 50% year-over-year mainly due to the deployment of Pelephone's HSPA network infrastructure as well as the initial stages of the company's NGN project.

### **Press Release**

#### **Conference Call & Web Cast Information**

Bezeq will conduct a conference call hosted by Mr. Shlomo Rodav, Bezeq Chairman and Mr. Alan Gelman, Bezeq Chief Financial Officer and Deputy CEO, on Thursday, August 21, 2008, at 4:00 PM Israel Time / 9:00 AM Eastern Time. Participants are invited to join the live conference call by dialing:

International Phone Number: +972-3-918-0609

Israel Phone Number: 03-918-0609

A live webcast of the conference call will be available on the investor relations section of the Bezeq corporate website at http://www.bezeq.co.il. Please visit the website at least 15 minutes early to register for the webcast and download any necessary audio software.

A webcast replay will be made available on the investor relations section of the Bezeq corporate website. An automated telephone replay will also be available approximately two hours after the completion of the live call through Thursday, August 28, 2008. Participants are invited to listen to the conference call replay by dialing:

International Phone Number: +972-3-925-5937

Israel Phone Number: 03-925-5937

#### About Bezeg The Israel Telecommunication Corp.

Bezeq is Israel's leading telecommunications service provider. Established in 1984, the company has led Israel into the new era of communications, based on the most advanced technologies and services. Bezeq and its subsidiaries offer the full range of communications services including domestic, international and cellular phone services; Internet, ADSL, and other data communications; satellite-based multi-channel TV; and corporate networks.
