### **Re: Immediate report – Class action against the Company**

On June 5, 2023, the Company received a claim with a motion for certification as a class action filed against the Company at the Tel Aviv District Court.

According to the allegations in the motion, the Company does not act in compliance with the law regarding sending notice on the upcoming termination of transactions for a fixed period, in that it fails to send a separate notice on the termination of the benefit period of the fixed-term transaction, and only notifies the customer of such in the monthly invoice and by sending a text message.

According to the motion, the class action amounts to more than NIS 2.5 million, however an accurate estimate cannot be made.

The Company is studying the details of the claim and at this stage, it is able to assess its implications.

Yours sincerely,

Bezeq – The Israel Telecommunication Corporation Limited
